

Jane Henney,

I am in favor of the FDA promptly approving claims filed for saw palmetto and the symptoms of benign prostatic hyperplasia; psyllium husk seeds and the risk of heart disease;; folic acid, vitamin B6 and vitamin B 12 and cardiovascular disease; and vitamin E and the risk of cardiovascular disease. I am very much concerned with the promotion of health. I am a college graduate currently working in the software industry for a start-up company called 10Fold. Please know that there are many people concerned with having these claims approved.

Thank-you,

Tanya Chidester
